

CANON EOS REBEL T7

1. BEFORE USE

- Ensure battery and SD card inserted
- Attach the straps and secure the camera at all times. Keep the lens cap on at all times unless actively using the camera
- Check the unit and all accessories for damage and cleanliness, and report to Max or Circulation Staff if anything is amiss (a small card in the case will indicate the included components)

2. BASICS

- Remove lens cap
- Power camera on with the toggle along the top
- Adjust the settings wheel on the camera's top to the green rectangle with an "A" – this is the automatic setting, which will attempt to identify the best capture settings
- Use the small window to locate and focus on your subject
- Press gently on the shutter button for the auto focus to adjust the lens, then fully to capture. Be aware in certain lighting conditions that the flash may flip open as well
- Review captured media with the  button next to the display

3. ADVANCED

- The wheel along the top has various preset settings for subjects and conditions. For the most control over your captures, use the "M" setting, for "Manual"

- The  button above the display and next to the small window will preview images on the display for easier preview
- Zoom in or out with the blue magnifying lens buttons, but for best image quality, move nearer or further from the subject.
- If a feature or button indicates it is not available in “Basic Zone Modes,” you will need to change to one of the following “Creative Modes”: M (Manual), Av (Aperture Priority), Tv (Shutter Priority), or P (Program)
- Operation Manual is available for additional support – see Max or search for “Canon Eos Rebel T7” online

4. WHEN FINISHED

- Transfer all recordings to your own devices, playing them back or reviewing them to ensure they sound and look correct. To remove the SD card, push to eject. Replace it by pushing back in until it “clicks” in place
- Delete your media from the SD card so the next person to use it has adequate space
- Bring item and all accessories to the Circulation Desk for checking in
